## *Course Objectives and Course Learning Outcomes:*

### **1. Industry Induction and Awareness (IIA) 2 Credit:**

- a. **Course Objectives:** Industry induction and awareness is an effort introducing individuals to the industry specific practices, norms, and expectations within various industry domains. It involves providing newcomers with comprehensive information about the industry's structure, operations, key players, and current trends. This induction aims to familiarize individuals with the unique challenges, opportunities, and dynamics of the industry, enabling them to navigate effectively within it.
- b. **Course Learning Outcomes:** Comprehensive and Improved understanding of the industry's structure, practices, and expectations. Improvement in Awareness and familiarity with industry terminology, Domains, regulations, and key industry players. Identify expected job roles in future and empower them to take suitable career decisions to make the right choice of industry domain matching with their area of interest.

### **2. Skill, Aptitude, and SWOT Analysis (SASA) 2 Credit**

- a. **Course Objectives:** The course and associated tests aim to equip students with essential skills in career planning, goal setting, and personal development through Skill Aptitude and Personal SWOT Analysis. By understanding skill assessment techniques and conducting personal SWOT analyses, students shall articulate clear career goals, develop personalized development plans, and enhance self-awareness. They shall also improve decision-making skills, ensuring they make informed choices about their academic and professional paths.
- b. **Course Learning Outcomes:** Upon completion of the course, students shall demonstrate the ability to conduct comprehensive skill aptitude assessments and personal SWOT analyses. They shall articulate clear and achievable career goals, supported by evidence from their analyses. Moreover, by emphasizing accountability and responsibility for their career outcomes, learners shall try to proactively seek opportunities, overcome challenges, and adapt to changing circumstances. This mindset shift shall help them avoid attributing success or failure solely to external factors such as institutions, placement agencies, parental or other external influence. Instead, they shall learn to leverage their strengths, address weaknesses, and seize opportunities to shape their desired career path.

### **3. Industry Connect Activity (ICA) 4 Credit**

- a. **Course Objectives:** A course fostering a problem-centric approach to industry internships is crucial, instilling skills vital for addressing real-world challenges. Emphasizing structured problem identification, articulation, and documentation, it equips students with critical thinking, communication, and analytical abilities essential for professional success. By preparing them to tackle industry issues proactively, the course not only enhances their learning experience but also cultivates valuable skills sought after by employers, fostering future career readiness.
- b. **Course Learning Outcomes:** Visible and measurable outcomes include enhanced critical thinking skills demonstrated through effective identification, articulation, and documentation of industry challenges. Improved communication abilities are evident in students' presentations and reports. Feedback from industry partners indicates the success of students' problem-centric contributions. Number of industries connected,

and number of problems captured demonstrates Increased confidence, independence, and long-term career readiness are observable outcomes, showcasing the course's effectiveness.

#### **4. Innovation & Technology Commercialization (ITC) 4 Credit**

- a. **Course Objectives:** To equip innovators with a comprehensive understanding of the distinctions between invention and innovation, as well as concepts such as Technology Readiness Level, Commercialisation Readiness Level, and Manufacturing Readiness Level. The course also covers IPR protection, innovation management, and incubation through theory, workshops, mentoring, and practical assignments.
- b. **Course Learning Outcomes:** Distinguish between invention and innovation. Understand and apply Technology, Commercialisation, and Manufacturing Readiness Levels. Protect intellectual property through IPR knowledge. Manage innovation and incubation processes effectively. Gain practical experience through workshops, mentoring, and assignments.

#### **5. Idea Resonator (IDR) 4 Credit**

- a. **Course Objectives:** This course is designed to equip students with the skills and knowledge necessary for effective problem identification and idea generation in the context of innovation. Through a series of modules, students will learn various techniques and methodologies to recognize, scope, and evaluate problems, as well as to generate, evaluate, and communicate innovative ideas. The course emphasizes practical application through hands-on activities, case studies, and collaborative projects, preparing students to address real-world challenges with creativity, critical thinking, and ethical consideration.
- b. **Course Learning Outcomes:** Recognize the importance of problem identification in innovation and its impact on solution effectiveness. Utilize various techniques for idea clustering, problem scoping, research, and interdisciplinary collaboration. Apply ideation techniques such as brainstorming, mind mapping, and design thinking to generate innovative ideas. Critically evaluate and prioritize ideas based on predefined criteria, using methods like SWOT analysis and feasibility assessment.

#### **6. Idea Accelerator (IAC) 4 Credit**

- a. **Course Objectives:** The course emphasizes the importance of assessing the technical feasibility, commercial viability, and business potential of innovative ideas can be instrumental in preparing students for entrepreneurial endeavours. Through lectures, case studies, workshops, and interactive discussions, students will learn key concepts such as market analysis, technology assessment, financial planning, and business model development. The course will also cover risk management, pitching techniques, and investor relations to help students develop a comprehensive understanding of the idea acceleration process.
- b. **Course Learning Outcomes:** After completion, student should be able to Understand the idea acceleration process and its importance in innovation. Conduct market analysis and assess market opportunities. Evaluate the technical feasibility of ideas and

assess technology readiness. Develop financial plans and allocate resources effectively. Develop and refine business models for proposed ideas. Identify, assess, and mitigate risks associated with idea acceleration. Pitch ideas effectively and build relationships with investors.

#### 7. *Start-Up Accelerator (SACC) 2 Credit*

- a. **Course Objectives:** To equip innovators with essential knowledge of statutory and regulatory compliance, including finalizing term sheets, co-founder agreements, company formation, valuation, and decisions about debt or equity. The course aims to prepare innovators to confidently engage with investors, bridging the gap for successful funding and scaling.
- b. **Course Learning Outcomes:** After completion of the course, the innovator should be able to Understand and navigate statutory and regulatory compliance. Finalize term sheets and co-founder agreements. Complete company formation and associated banking processes. Assess company valuation and make informed debt or equity decisions. Confidently present to investors, securing funding for scaling and register start-up under DPIIT registration portal.

#### *Why to Join the Program:*

Candidates with entrepreneurial inclination should join this "22 Credit Innovation and Entrepreneurship Skill Program" to gain a competitive edge in the professional world. This program offers comprehensive industry insights, practical skills, and hands-on experience through internships and real-world problem-solving. By fostering critical thinking, innovation management, and entrepreneurial capabilities, it prepares participants to navigate industry challenges, launch successful ventures, and confidently engage with investors, ensuring a robust foundation for their future careers.
